

LOGNOTE -- Chief, Operations Group, 9 August 1983

1. [] The following items were mentioned at this morning's staff meeting:

- The annual review is tentatively scheduled for 28 September. As in the past we will brief DD/S&T on the FY 1984 plan and he will later tell us what he wants us to do. Specific guidance from S&T is expected in E&PS today or tomorrow.

- Some heavy cuts are anticipated in the FY 1985 budget. The Agency has been asked to consider cuts of 4, 8 and 12 percent below the DCI recommended level. It's too early to know what this will really mean in the long run.

- The call for FY 1986 R&D proposals is expected shortly.

- D/FBIS plans to hold an FBIS planning session at Chamber of Commerce building on 3 November.

- The Panama wage scale has been signed by D/Pers and AS is cutting personnel actions.

- [] and I met this morning to discuss the new pouch system. The decision is to return to the former system and reestablish full registry functions in FBIS. To get this started Admin will need help. I asked [] to see if he could locate someone in Publications Staff.

- D/FBIS wants to report to DD/S&T on the Bangkok contingency satellite monitoring project tomorrow.
